Installation

Using the mounting plate provided with your Vacuum System, secure the mounting plate to the wall at a height allowing easy access for maintenance of the filter, dirt receptacle and or bags.

Please note: *Monarch Systems must be at least 10 to 15 cm off the ground.*

Contrary to all other connections in the ducting of your vacuum system, do not glue the last fitting going into your unit. This will allow easy removal for any repairs.

Attach your low voltage wires to the low voltage inlet on the side of your unit. Simply strip the wires approx 1/2 cm and clamp them into the plugs supplied. Plug the power cord into the 240 Volt power point and you are ready to start cleaning.

Muffler Installation

Monarch 490, 550 and Premier 490, 550, 4000 and 5000 are supplied with a exhaust muffler. These simply fit on to the side of your unit with the elbow supplied. Place the elbow onto the exhaust of the motor, it's best to tape the elbow to the muffler.

How to change from a Bagless System to a Bag System

Premier 3000, 4000 and 5000 units come Standard as a Bagless System. These units can be used as a bag system.

- Remove weighted filter - leaving in secondary filter
- Attach the 45 degree bend to the pipe inside the unit
- Glue or tape bag adaptor to the 45 degree bend
- Push bag over the top of the adaptor
- Replace bottom bin
- Unit is now ready to be used as a Bag System

Operation & Care

STARTING VACUUM – Simply open inlet cover, insert hose and system will automatically start. To stop, remove hose and allow suction to reduce before closing the inlet.

If you have chosen a switch on/off handle hose plug the hose into the inlet with arrow facing up, use handle on/off switch to operate.

Operating Garage Point. Open inlet cover and insert hose. Turn the switch on the side of the system to the ON position. When finished turn switch off and remove hose.

TIPS TO CARE FOR YOUR DUCTED VACUUM SYSTEM – Your system's unit is warranted against defective materials and workmanship but not against misuse. There is a service charge for repairing or replacing damaged or misused components of the system and for service calls. To ensure your ducted system is a life-time improvement for you and your family. Follow these simple tips and you will enjoy it for many years.

1. Do not place any articles around the motor of the power unit.

To do so could cause the motor to overheat as it will impair the cooling of the motor.

2. Use one inlet at a time to maintain proper air flow.

To use more than one vacuum inlet at a time will reduce the air flow that is required to effectively operate the system.

3. Hold inlet door open when removing hose.

After removing the hose from the inlet, hold the inlet door open for a few seconds to make sure the unit has stopped and to clear any residual dirt out of the ducting.

4. Do not vacuum up liquids.

Do not vacuum liquids into the vacuum ducting as any liquid left in the ducting may cause major motor damage (not covered by warranty).

WARNING

- USE ONLY GENUINE PREMIER CLEAN DOUBLE LINER BAGS WHICH PROUDLY DISPLAY THE GENUINE PREMIER CLEAN LOGO.
- WHEN CHANGING BAG, CHECK MESH UNDER BOTTOM PLATE FOR LINT BUILD-UP, AND CLEAN IF REQUIRED.

DO NOT VACUUM PLASTER DUST, CONCRETE DUST, BRICK DUST, TALCUM POWDER OR ANY LIQUIDS.

FAILURE TO COMPLY WILL VOID ANY IMPLIED WARRANTY.

Accessories

9mt Standard Hose & Tool Set

2 Way Brush

For use on carpets and vinyl/tiles.
Not recommended for floorboards, slate etc

Telescopic Wand

Adjustable to the height you desire, simply push the button and extend to desired length.

Log onto www.premierclean.com.au
or call **1300 881 608** for your nearest dealer.

Turbo Cat

Hose Sock - Available in 9mt and 12mt

Motor

1. There is no maintenance to be performed on the actual motor of your ducted Vacuum. The most important tips for a longer vacuum life are, to keep the inside of the (canister) clean
2. Make sure you do not vacuum up ANY liquids, brick, concrete, plaster or similar dust.
3. Should you require a service to your unit please contact Premier Clean service department on 1300 881 608

Changing Bags and Filters

WARNING

“FAILURE TO USE PREMIER CLEAN DOUBLE LINER FILTER BAGS WILL CAUSE MOTOR FAILURE AND VOID WARRANTY”

Monarch 250, 490, 550, 650 Compact 2

Lift lid and remove bag adaptor from used bag, replace on pipe in canister. Insert new bag and replace lid. If bag is broken or split, lift bottom plate and clean around airway to the motor and replace plate, wipe inside unit with a cloth to remove excess dirt.

Premier 250, 490, 550 (3000, 4000, 5000 if taken the option to use as a bag system)

Unclip bottom bin and remove bag adaptor from used bag, replace on pipe in canister. Insert new bag and replace bottom bin. If bag is broken or split, clean secondary filter located above the bag.

Premier 3000, 4000, 5000 Bagless model

Unclip bottom bin and remove dust canister empty contents. Remove weighted filter clean and replace, check secondary filter if dirty clean and replace. Weighted filter to be replaced once a year, secondary filter to be replaced every two years.

PROOF OF PURCHASE

Proof of purchase in the form
of the product warranty card
and/or invoice is a condition of
this warranty and without such
proof this warranty shall not
bind Premier Clean.

**No term of this warranty
purports to exclude,
restrict or modify the
application of any of the
provisions of Part V of the
Trade Practices Act 1974
or of Part IV of the Goods
Act 1958 (Victoria).**

If assistance is required in
understanding the terms and
conditions of the warranty you
should contact either the Dealer
from whom the product was
bought or the Company.
